

Battle Bots Summer Camp

Join us for a robotics summer camp! Battle bots is a high intensity competition based camp in which students will engineer, program, bluetooth control, and compete using their robot against other teams robots. We will keep a running scoreboard throughout the week to keep track of the king bot of the ring :) The final day of competition will include an awards ceremony for the teams with best points, engineering, programming, team work, overcoming adversity, etc... This is an all inclusive camp. Kids show up and we take care of the rest. This summer robotics program is now enrolling. Ecobot's Robo Joe will be the lead teacher of this camp. He will be accompanied by his team of teachers from Aha Education.

June 15th-18th
10:00 am to 3:00 pm
James D. Eggers, ISC
4810 Magnolia Cove Dr.
Kingwood, TX 77345
